THE JOURNAL OF THE SOCIETY OF AUTOMOTIVE ENGINEERS

INDEX TO VOLUME IX, JULY-DECEMBER, 1921

	PAGES
July	1-80
August	81-164
September	165-216
October	217-288
November	289-350
December	351-454

A

Aberdeen Proving Ground

Inspected 323
Proposed inspection 84, 208, 217
Accurate thread-cutting 300
Activities of the Sections 78, 159, 208, 284, 348, 445

Addresses

Bachman, B B 73
Beecroft, David 1
Correct, of members 171
Goode, J P 139
Administrative Committees, S A E 165
Advantage of gas producer 324

Aeronautic Division, S A E

Activities 285
Personnel 364
Report at annual meeting 383
Aeronautic engineering session 289
Aeronautic meeting, Dayton 77

Aeronautical Safety Code

Conference on 130
Preparation of American 153
Sectional committee 285

Aeronautics

Coming developments 179
Conference on safety code 130
Future types of engines 24
Requirements of powerplant development 23, 246, 331
Safety code, preparation of 153
Aims of Research Department 438

Air

Humidifying devices 337
Production of liquid 436
Relative heat-absorption of fuel and 35
Aircraft 356

Aircraft

Characteristics for a high-speed airplane 29
Inspection and examination 152
Marine 130
National, state and private rights 151
On the R38 disaster 381
Powerplant installation 30
Radiator performance in terms of speed 330
Radiators for engines 328
Safety fuel-tanks for 283
Status of manufacturers 128
Airdromes, customs 128
Air injection 9

Air-Flow

In carbureters 87
Through air-valves 89

Airplanes

Carburetion 93
Characteristics for a high-speed 29
Enclosed cabins 129
Flights of two new, at McCook Field 52
Insurance 125
Materials of construction 129
Merits of different splices for wing beams 133
New type of propeller 181
Non-injurious ultimate-strength tests for interplane struts 201
Number of engines 129
Tests of wing beam splices 135
Transferable packing cases 130
Two-man altitude flight 22
Air-routes and rules of the air 153
Air Service, radio-controlled automobile developed by the 287
Air transportation and the business man (V E Clark) 245
Alcohol and shale oil 269

Alcohol

Carburetion of 172
Low compression 319
Requirements for using pure 319
Starting on 319
America as a world power (J P Goode) 139
America, payrolls in 118
American and British bank deposits 130
American and British income tax 19
American and European automobile practice, comparison of (Maurice Olley) 109
American car wins Grand Prix 212

American Engineering Standards Committee

Representatives appointed 84
Sectional committees 169
America's opportunity 360

Annual Meeting, S A E

Aeronautic engineering session 289
Announced 218, 289, 446
Automotive materials session 290
Body engineering session 289
Business meeting 289
Carnival and dinner 290
Commercial vehicle session 289
Fuel and engine session 290
Lubrication session 289
Passenger-car session 290
Research session 289
Ricardo, Harry, to present paper 289
Standards Committee report 289
Anti-freezing solutions 307

Anti-Freezing Solutions

Bureau of Standards report 308
Preliminary report of S A E committee 307
Anti-knock substances 295
Artificial versus natural means of drying paint and varnish (R E Lippert) 335
Ash in automobile bodies, substitutes for 181
Assigning jobs for maximum production 75
Attendance at Standards Committee meeting 74
Attitude of the executive to standards 356
Automobile building in England 326
Automobile frame stresses (Ethelbert Favary) 301
Automobile industry 188
Automobile laboratory at University of Michigan 155
Automobile locking-device classification and theft insurance (A R Small) 95
Automobile standardization in Great Britain (A A Remington) 377

Automobiles

American wins Grand Prix 212
Building in England 326
Car idiosyncracies 111
Comparison of European and American practice 109
Comparison of general design 113
Design factors of the fire hazard 99
Developing a high-compression engine 268
Differences in American and European conditions 109
Elements of fuel economy 263
Foremost economic force in the industry 351
Forms of insurance 97
Frame stresses 301
Industry 188
Laboratory at University of Michigan 155
Locking-device classification and theft insurance 95
Motorcycles and small cars 110
Passenger-car mixture requirements 91
Practice and theory in clutch design 275
Radio-controlled developed by the Air Service 287
Relation of design to insurance 97
Schedule method for fire-insurance classification 97
Selling conditions in Europe 111
Standardization in Great Britain 377
Straight-eight engine 19
Substitutes for ash in bodies 181
Theft retardants 95
Volume of theft insurance 96
Automotive-engineering research (Dr H C Dickinson) 437

Automotive Industry

Beginning of standardization 33
Developing a high-compression engine 5, 268
Oil engine possibilities 269
Origin of standardization 371
Research in 81
Automotive materials session at annual meeting 290
Automotive oil engine possibilities 269

Aviation

Air-routes and rules of the air 153
Character of the administrative body 153
Commercial in the eastern hemisphere 123
Customs airdromes 128
Government assistance 126
Importance of commercial 151
International Aero Congress 381
International air convention 127
Landing-fields 152
National, state and private rights 151
Nature and scope of immediate Federal legislation 153
Need for Federal control in commercial 151, 245
Passports and visés 128
Situation in the United States regarding commercial 152
Transportation and the business man 245
Truth about commercial 381

Axle and Wheel Division, S A E

Activities 209, 210
Personnel 364
Subjects assigned 382

B

Bachman, B B, address 73
BACHMAN, B B, ON RELATION BETWEEN THE HIGHWAY AND THE VEHICLE 297
BACHMAN, B B, ON S A E STANDARDS, THEIR VALUE, RECOGNITION AND FUTURE DEVELOPMENT 355
BACHMAN, B B, ON STANDARDIZATION AS BROUGHT ABOUT BY THE SOCIETY OF OF AUTOMOTIVE ENGINEERS 33

Ball and Roller Bearings Division, S A E

Activities 287, 345
Personnel 77, 364
Report at annual meeting 383
Report at summer meeting 55
Ball bearings 290
Band-and-shoe types of clutch 46
Bank deposits, British and American 130
BARNARD, DANIEL P, 4TH, ON CONDENSATION TEMPERATURES OF GASOLINE AND KEROSENE-AIR MIXTURES 313

Beams

Material and construction of 133
Merits of different splices for airplaine wing 133
Value of dowels and bolts 137

Bearings

Ball 290
Inch-size roller 207
BEECROFT, DAVID, ON SOCIETY'S RESEARCH PROGRAM 1
Beginning of automotive standardization 33
Beginning of combustion 183
Belt work, use of tractors for 333
Blueprints 118
Bodies, substitutes for ash in automobile 181
Body engineering session at annual meeting 289
Boston Section name changed to New England Section 77
Brake-lining tests 74, 380
Brakes, clutch 47
British and American bank deposits 130
British and American income tax 19
Bureau of Standards report on anti-freezing solutions 308
Business meeting at annual meeting 289

C

Calcium chloride for roads 348
CAMPBELL, LORN, JR, ON SURVEY OF OXY-ACETYLENE WELDING 320
CANBY, A T, ON NATURE OF FLAME MOVEMENT IN A CLOSED CYLINDER 237
Carbonization test 54
Carbureter versus fuel injection 85

Carbureters

Air-flow in 87
Conditions in, during normal operation 86
Engine tests and 93
Flow of air through air-valves 89
Fuel-flow in 90
Fuel injection versus 85
Fundamental points of action 85
Passenger-car mixture requirements 91
Venturi tube in 88

Carburetion of alcohol (A W Scarratt) 172
Carnival and dinner at annual meeting 290
Casein glues 312
Cast-iron valve-heads, proposed specification 118

Chain Division, S A E

Activities 345
Personnel 364
Report at annual meeting 384
Report at summer meeting 55

Chaos in mechanical transport 360
Characteristics for a high-speed airplane 29
Characteristics of present engine fuels 6
CHASE, HERBERT, ON PRACTICE AND THEORY IN CLUTCH DESIGN 39, 275
Chassis stresses 143
Chemical phenomenon, is lubrication a 194
Chicago fuel meeting announced 446
Chicago meeting, S A E, announced 218, 290
CLARK, V E, ON AIR TRANSPORTATION AND THE BUSINESS MAN 245
Classes of research 20
Classification of internal-combustion engines 7
CLERK, SIR DUGALD, ON CYLINDER ACTIONS IN GAS AND GASOLINE ENGINES 253
Clutch brakes 47
Clutch facing standards 379

Clutches

Band-and-shoe types 46
Cone type 39
Details of design 46
Facing standards 379
Multiple-disc type 43
Notes on the theory of design 48
Practice and theory in design 39, 275
Single-plate type 40
Specifications of various types 49

Coal, converting, into gas 324
Coal tar a source of oil 324
Code, aeronautical safety 285
Color control of paint 338

Combustion

Beginning of 183
Elementary 292
Inoffensive 184

Coming aeronautical developments 179
Coming Society meetings 217

Commerce

International 117
Shipbuilding and foreign 139

Commercial aviation in the eastern hemisphere (E P Warner) 123
Commercial competition aided by standards 356
Commercial vehicles session at annual meeting 289

Commercial Vehicles

Knowing the facts about the market 38
Making a market analysis and its results 38
Market analysis 37

Committee organization of the Society 165

Committees

Administrative S A E 165
Aeronautical Safety Code Sectional 285
Anti-freezing solutions 307
Cooperate with National Implement and Vehicle Association and American Society of Agricultural Engineers 77
Formulation of agricultural equipment standards 77
Internal, organization 327
Organization of S A E 165
Personnel of 1921 Standards 364
Professional S A E 168
Sectional of American Engineering Standards Committee 169
Standards, S A E 168
Standards, S A E, report 289
Tractor pulley widths and speeds report 53

Community interests 361
Comparison of European and American automobile practice (Maurice Olley) 109
Comparison of general design of automobiles 113
Compressions, low 319
Concrete roads 149
Condensation temperatures of gasoline and kerosene-air mixtures (Robert E Wilson and Daniel P Barnard, 4th) 313
Cone type of clutch 39
Conference on aeronautical safety code 130
Constant-pressure method 18
Convention, International Air 127
Converting coal into gas 324
Cooling, oil for tractor engines 310
Cooperation and coordination 19
Cooperation in research (W E Lay) 155
Cooperation in research, necessity of 3
Coordination and cooperation 19
Cores, heat dissipating power of 328
Correct addresses of members 171
Costs of planning for fresh output 361

Costs

Decreasing production through standardization 379
Maintenance and operating of motor trucks 234
Planning for fresh output 361

Council Meetings

May 77
June 77, 84
September 244
October 382

Crankcase, eliminating dilution by manifold development 35, 260
Cultivating with tractors 332
Current standardization work 118, 209, 285, 345
Cushion tires and wheels 145
Cushioning in motor-truck design (C O Guernsey) 143
Customs airdromes 128
Cylinder actions in gas and gasoline engines (Sir Dugald Clerk) 253

Cylinders

Actions in gas and gasoline engines 253
Conditions during normal operation 86
Looking into a gasoline-engine 32
Nature of flame movement in a closed 237

D

Dayton aeronautic meeting 77
DEAN, E W, ON PROBLEMS INVOLVED IN DEVELOPING ENGINE GASOLINE SPECIFICATIONS 131
Decreasing production costs through standardization (W D Pardoe) 379
Demonstration, Fargo tractor 108
Design and production 169
Design factors of the fire-hazard 99
Design of motor trucks for high-speed service (C O Guernsey) 232
Designing rings for gas-tightness 196
Designing the truck to conserve the road 121
Destruction of road surfaces 121
Details of clutch design 46
Developing a high-compression automotive engine (F C Ziesenheim) 5, 268
Development work on mechanical-injection system 16
Developments in piston design 199, 370
Dew-point of gasoline, determining 265
Diagonal and lap joints 195
DICKINSON, DR H C, ON AUTOMOTIVE-ENGINEERING RESEARCH 437
DICKINSON, DR H C, ON RESEARCH IN THE AUTOMOTIVE INDUSTRY 81
Diesel engine size 179
Difference in molecular structure 295
Dinner, annual 290
Direct method of testing struts 201
Direction-finding wireless 374
Domestic purchasing power 436
DORRIS, G P, ON ELIMINATING CRANKCASE DILUTION BY MANIFOLD DEVELOPMENT 35, 260
Drying equipment, installations of artificial 339
Drying paint and varnish, artificial versus natural means of 335

Drying

Artificial versus natural means for paint and varnish 335
Humidifying devices 337
Installations of artificial equipment 339

DUNHAM, G W, ON S A E STANDARDIZATION 371
Duplication of research 440

E

Education for highway transport (C J Tilden) 170, 282
Education, general status of technical 104
Educational laboratories 82
Educational laboratories, research problems for 440
Effect of manifold vacuum upon vaporization 87
Electric Vehicle Division, S A E, personnel 84, 364

Electrical Equipment Division, S A E

Activities 209, 212, 287, 345, 347
Personnel 364
Report at annual meeting 385
Report at summer meeting 57
Subjects assigned 382

Elements of automobile fuel economy (W S James) 263
Eliminating crankcase dilution by manifold development (G P Dorris) 35, 260
Elimination of vibration 146
Enclosed cabins in airplanes 129

Engine Division, S A E

Activities 285, 287, 346, 347
Personnel 77, 84, 368
Report at annual meeting 388
Report at summer meeting 62
Subjects assigned 382

Engineering analysis applied to truck selling (N J Ocksreider) 37
Engineering approach 347
Engineering department 2
Engineering education, professional 180
Engineering success 306

Engineering

Introducing six-year course 180
Production 75
Production for the small shop 75
Profession compared with law and medicine 180

Engineering's view 382

Engines

Air injection of fuel 9
Anti-knock substances 295
Automotive oil possibilities 269
Carbureter and, tests 93
Carbureter versus fuel injection 85
Characteristics of present fuels 6
Classification of internal-combustion 7
Conditions in cylinder, manifold and carbureter during normal operation 86
Constant-pressure method of fuel injection 18
Cylinder actions in gas and gasoline 253
Developing a high-compression automotive 5, 268
Development work on mechanical-injection fuel system 16
Diesel size 179
Effect of manifold vacuum upon vaporization 87
Exhaust gas in fuel charge 444
Fundamental points of carbureter action 85
Future types of aeronautic 24
Gas-pressure injection of fuel 11
Governing the, and traction 233
Important factors in piston-ring design 195
Internal-combustion lubricants 54
Looking into a gasoline, cylinder 32
Low compressions 319
Mechanical injection of fuel 13
Methods of increasing the fuel supply 6
Mounting in the frame 305
Number in airplane 129
Oil-cooling of tractor 310
Problems involved in developing gasoline specifications 131
Radial 25
Radiator problem factor 311
Radiators for aircraft 328
Requirements for using pure alcohol 319
Selecting and adapting the most economical 7
Starting on alcohol 319
Still marine 435
Straight-eight 19
Suction stroke most important of the cycle 54
Support 150
Time factor required for vaporizing 36
Torque, throttle position and manifold vacuum, relation of 86
Variable-pressure type of fuel injection 17
Variations in characteristics 26

England, automobile building 326
Euler class strut, slender or 205

Europe

Automobile selling conditions 111
Payrolls in 118

European and American automobile practice, comparison of (Maurice Olley) 109
European screw-thread practice 331

Executives' aid essential for S A E Standards 351
Exhaust gas in fuel charge 444
Extent and effect of S A E standards 4

F

Fargo tractor demonstration 108
Farm Power Meeting, discussion of papers 172
Farm tractor prospects 330

Farms

General tractor 332
Motorized stock 325
Tractor prospects 330
FAVARY, ETHELBERT, ON AUTOMOBILE FRAME STRESSES 301
Filler-rods for welding 321
Flame (C A French) 182
Flame movement, nature of, in a closed cylinder 237
Flame propagation, oxidation and 185
Flexibility of tractors 334
Flights of two new airplanes at McCook Field 52
Flow of air through air-valves 89
Food and clothing 141
Fool proofness of tractors 334
Foremost economic force in the automobile industry 351

Frames

Engine mounting in 305
Rigidity 304
Stress calculations 301
Stresses 301

Frames Division, S A E

Personnel 368
Report at annual meeting 391
France, tractors in 120
FRARY, H D, ON MERITS OF DIFFERENT SPLICES FOR AIRPLANE WING BEAMS 133
FRENCH, C A, ON FLAME 182
Fuel and engines session at annual meeting 290
Fuel-flow in carbureters 90
Fuel problem 5
Fuel research developments (C F Kettering) 291

Fuels

Advantage of gas producer 324
Air-injection method 9
Alcohol and shale oil 269
Anti-knock substances 295
Bibliography on problem 441
Carbureter versus injection 85
Carburetion of alcohol 172
Characteristics of present engine 6
Chicago meeting announced 446
Coal tar a source of oil 324
Condensation temperatures of gasoline and kerosene-air mixtures 313
Constant-pressure method of injection 18
Converting coal into gas 324
Determining the dew-point of gasoline 265
Development work on mechanical-injection system 16
Difference in molecular structure 295
Discussion of results of tests 318
Elementary combustion 292
Elements of automobile, economy 263
Exhaust gas in charge 444
Experimental methods 314
Future objectives of research 344
Gas-pressure injection method 11
General effect of the situation 440
General properties of satisfactory engine gasoline 131
Limits in gasoline specifications 132
Mechanical-injection method 13
Methods of determining the condensation points of air mixtures 313
Methods of increasing the engine supply 6
Mileage increase and anti-knock materials 270
Passenger-car mixture requirements 91
Principle of total gasification 324
Problem 5
Problems involved in developing engine gasoline specifications 131
Relative heat-absorption of air and 35
Requirements for using pure alcohol 319
Research developments 291
Safety tanks for aircraft 283
Starting on alcohol 319
Time factor required for vaporizing 36
Utilization and ignition point 296
Variable-pressure method of injection 17
Fundamental points of carbureter action (F C Mock) 85
Future of road-transport (Lord Montagu) 200
Future type of aeronautic engines 24

G

Gage and clearance of tractors 332

Gas

Converting coal into 324
Exhaust, in fuel charge 444
Gas-pressure injection 11
Gas producer, advantage of 324
Gases, origin of the pressure-waves crossing the burning 239
Gasification, principle of total 324

Gasoline

Condensation temperatures of, and kerosene-air mixtures 313
Determining dew-point of 265
General properties of satisfactory engine 131
Limits in specifications 132
Problems involved in developing engine specifications 131

Gears

Equipment and ratios 234
Helical and worm 224
Helical and worm calculations 225
Hobbing helical and worm 227
Hobs and gear-hobbing 222
Involute teeth 220
Lubrication of timing 107
Methods of design and gear-cutting 219
Ring-type thread-milling 228
Specifying tooth sizes 220
